

The Ancient Universal Calendar Calibration in Metonic Lunations and Solar Tropical Cycles

A Science of Time Encodings and a Mayan Calendar Mythology for a World in Transition and the Schwenger Moons

The Chronos of the Ancients as a Count of Units of Time

The measurement of time is based on a period or duration of a perceived 'flow of time' from an experienced viewpoint or frame of reference of a present moment or Now-Time.

Division of this experienced duration into units of time from some experienced past to the present nexus to some future time of expectation and projection then allows the chronologer or timekeeper to devise calendars of time, constructed by utility of such defined units and cycles of time.

Should a particular cycle of time, known as a precessional cycle of the seasons become associated with a sentient and self-aware universal civilization or culture; then the self-conscious civilization observing an experienced cyclicity of day and night in sunrise and sunset, would naturally construct its calendar in a counting of days and nights. This culture would also observe celestial phenomena associated with lights in the sky in cycles and movements of the Moon in the sky of the darkness of the night and the motion of the Sun in the sky of the light of the day.

The ancient timekeeper then divided a period of day light followed by a night of darkness as a full cycle into four quarter cycles or 'watches' to allow the experiencers of time a refined sensual awareness of this time. Observing the night sky and the stars spanning the sky in the duration of a night or half of a full cycle; the ancient astronomer and stargazer observed a changing of the 'lights in the sky' in a number of full cycles he/she counted before the stars appeared to return to their starting points of a particular measured and recorded observation.

One ancient stargazer counted the number of full cycles as approximately 360 and further observation of this cyclicity or Year improved the observations to 365 full cycles. The first observation of 360 days however divided the superimposed spherical geometry of the night sky into 360 degrees and so the Cycle-Degree year subdivided into 360 degree-days became the basis for the astronomical observations applied to the 365 day full cycle year for the 'return of the seasons' known as the tropical year of 365.24219 'mean solar days' in the chronos of the 'precession of the equinoxes' at the end of one such precessional cycle.

One such Calendar of precession is the Mayan calendar of the Long Count, counting precisely 9,360,000 full cycles as 24 hours as four watches of 6 hours each, with each watch defining a quarter of the celestial circle of 360 degrees as 90 degrees. 12 hours or two watches then specify a day of light ruled by the Sun and 12 hours or two watches define a night of darkness ruled by the Moon and the stars. Dividing a watch of 6 hours into 6 hours then associates one hour as 15 degrees of the circle in $24 \times 15 = 360$ and defines a proportional time measurement in one hour in a day of 24 hours being equal to 15 days in a Degree-Year of 360 degree days.

This Mayan calendar simply counts the number of days and nights as half cycles and remains

independent from any synchronization with the dynamics of the sun and the moon as related to the variations of the precessional cycle and so the tropical year of the seasons.

If now the Mayan calendar is considered to derive from a more ancient calendar, say of the 'Ancient Maya' or the 'Universal Ancients of Days'; then the Mayan calendar can be used as a calibration and synchronization with other ancient calendars to align the tropical year of the seasons with the simple day count of the 'Calendar Year of the Ancients' also known as the 'Great Platonic Year' or a 'Prophetic Year of Ancient Encodings'.

The precessional year of the ancients of 9,360,000 days is subdivided into $5 \times 13 = 65$ Baktun of 144,000 days or Kin each for $65 \times 144,000 = 9,360,000$ days. A Baktun is divided into 20 Katun of 7200 Kin and a Katun is divided into 20 Tun of 360 Kin as the time unit of the Degree Year of the ancient code. The Mayan factorization for the 'Ancient Year' as a day count from the grand precessional Kin count so is $360 \times 20 \times 20 \times 65 = 360 \times 400 \times 65 = 360 \times 26,000 = 144,000 \times 65$ for a precise timing of 26,000 360-Degree-Years for the duration of an ancient precession.

The Hebrew Calendar is based on the Lunar Cycles of 29.530594... mean solar days from one New Moon to the next New Moon as a synodic month of 29.530588 days. The Hebrew Calendar engages a Metonic Calendar which aligns 235 synodic lunations with 19 solar years as a synodic month in $235 \times 29.530588 = 6939.68818.. = 19 \times 365.2467463...$ This then defines a Hebrew metonic solar year as 365.2467.. Years.

A tropical year measured from Equinox to Equinox is 365.2421988 days for an error of divergence of $\{0.2467463-0.2421988=0.0045475\}$ or $1/0.0045475$ as 1 Day in 219.90 Years from the metonic solar-tropical year used in the Hebrew calendar.

The error of divergence using the lunar chronos in the Hebrew calendar calculates as $\{0.530594-0.530588=0.000006\}$ or $1/0.000006$ as 1 Day in 166,666.7 lunar months or 1 Day in 13,888.9 Years.

The ancient scribes and astronomers of antiquity then incorporated this divergence between a solar based time keeping and a lunar based chronos in observing the precessional cycle of the Earth. The calibration of calendars used by the Hebrews and Babylonians using the metonic cycle then can be blended and superimposed with solar-based civil calendars, such as the Julian and the Gregorian. It can also be encompassed by a simple count of days, such as the time keeping used by ancient cultures, such as the Maya.

The Ancient Universal Calendar Calibration in Metonic Lunations and Solar Tropical Cycles

The key to calibrate the lunar calendars of the metonic 19-year cycles with the solar calendars of the seasons known as the year of March-September equinoxes and June-December solstices is found in the multiplicity of calendars used by the Maya and their ancestors of antiquity, whose legacy is found in extending the precessional day count by a factor of five to $5 \times 65 = 325$ Baktun or 46,800,000 Kin as 130,000 Ancient Years and a further extension to indicate the appearance of sentient man (Homo Sapiens Sapiens) in a factor of $73 \times 13 \times 5 = 73 \times 65 = 4745$ Baktun as $4745 \times 144,000 = 683,280,000$ days as 1,898,000 Ancient Years.

The Maya calendar of the Baktun count as a Long Count is supplemented by the Haab of 365 Kin adding 5 'purification' days known as Vayeb to a Tun to begin in a Mayan Haab New Year starting with Pop. A Mayan Haab so aligns to a Tropical year of the seasons as a solar based calendar with an error of a watch or a quarter of a day and is therefore compatible with a Gregorian or Julian year of the present era. The lunar alignment of the Mayan calendar is found in the Tzolkin given as 260 Kin.

The $13+7=20$ Tzolkin Days and every 20th day an Ahau glyph, order as: {Imix-Ik-Akbal-Kan-Chicchan-Cimi-Manik-Lamat-Muluc-Oc-Chuen-Eb-Ben-Ix-Men-Cib-Caban-Edznab-Cauac-Ahau}.

However, there is no 14,15,16,17,18,19,20 count for the Tzolkin glyphs and the sequence is 1,2,3,4,5,6,7,8,9,10,11,12,13,1,2,3,4,5,6,7 in one-to-one correspondence with the 20 Tzolkin glyphs.

For the Mayan Year of the Haab of 365 Kin; there are 18 Mayan 'Months' of 20 Days/Kin each; followed by 5 supplementary 'purification' Days of Vayeb in order:

{Pop-Uo-Zip-Zotz-Tzek-Xul-Yaxkin-Mol-Chen-Yax-Zac-Ceh-Mac-Kankin-Muan-Pax-Kayab-Cumku--Vayeb 0,1,2,3,4}.

The five Vayeb subsequently describe five added days to an ancient 360-day year as a solar year, counting between 365 and 366 days in a four-year leap-year cycle of $3 \times 365 + 366 = 1461$ days as a full 4-year cycle. Subtracting the five Vayeb from the ancient year in corollary depicts an approximation for a lunar year of 52 weeks as $7 \times 52 = 364$ days in 12 synodic months of $12 \times 29.530588 = 354.36706$ lunar years.

A Calendar Round is the combination of the Haab of $365 = 5 \times 73$ Kin with the $260 = 5 \times 52$ Kin of the Tzolkin with the common factor 5 defining the repeating mode to be $73 \times 260 = 18,980$ Kin or 52 Haab years =

51.965475 Common Years.

This represents a factorization from the encompassing Tzolkin-Haab product $260 \times 365 = 94,900 = 5 \times 18,980$ in the factor 5 for a 'Common-Civil' Year of 365.2425 Gregorian days.

72 Calendar Rounds are $72 \times 18,980 = 72 \times 260 \times 73 = 260 \times 5256 = 72 \times 365 \times 52 = 365 \times 3744 = 1,366,560$ Kin/Days as 3744 Haab or 3741.5142 common years.

98 Calendar Rounds are $98 \times 18,980 = 98 \times 260 \times 73 = 260 \times 7154 = 98 \times 365 \times 52 = 365 \times 5096 = 1,860,040$ Kin/Days as 5096 Haab or 5092.61655 common years.

360 Calendar Rounds are $360 \times 18,980 = 360 \times 260 \times 73 = 260 \times 26,280 = 360 \times 365 \times 52 = 365 \times 18,720 = 6,832,800$ Kin/Days as 18,720 Haab or 18,707.571 common years and as 73% of the entire precessional cycle of 26,000 Ancient Years.

720 Calendar Rounds are $720 \times 18,980 = 720 \times 260 \times 73 = 260 \times 52,560 = 720 \times 365 \times 52 = 365 \times 37,440 = 13,665,600$ Kin/Days as 37,440 Haab or 37,415.142 common years and as 146% of the entire precessional cycle of 26,000 Ancient Years.

7200 Calendar Rounds are $7200 \times 18,980 = 7,200 \times 260 \times 73 = 260 \times 525,600 = 7200 \times 365 \times 52 = 365 \times 374,400 = 136,656,000$ Kin/Days as 374,400 Haab or 374,151.42 common years and as 14.6 completed precessional cycles.

In the metonic cycles of lunations, used in the Mesopotamian and Hebrew calendars, 19 tropical years closely approximate 235 synodic months in $19 \times 365.24219 = 6939.601$ days with $235 \times 29.530588 = 6939.688$ days.

But adding one Tzolkin day count of 260 days to 19 Haab day counts of $19 \times 365 = 6935$ in the Mayan calendar the Mayan Kin count calibrates the Metonic day count with the Mayan Kin count in $19 \times 365 + 260 + 5 = 7200$ should the five Vayeb days of the 'purification' be added to the calculus.

As 7200 Kin define the Mayan Katun as 20 Mayan Tun in $20 \times 360 = 7200 = 265 + 6935$, adding a 'cosmic gestation' of 265 days to a Mayan day count of 19 Haab of 6935 Kin will crystallize the five Vayeb days of 'ancient purification' as a 'universal pregnancy' separating the Mayan Long Count or Mayan great precessional ages from each other.

The prime number factorization of the Tzolkin-Haab cycle of $260 \times 365 = 94,900 = 5 \times 18,980 = 73 \times 13 \times 100 = 73 \times 13 \times 5^2 \times 2^2 = 73 \times 13 \times 25 \times 4 = 73 \times 1300$ then defines the overall Mayan calendar composition calibrated to any lunar, solar or lunisolar calendar system used to divide a tropical year into its months and seasons in the pure day count of the Mayan calendar in the factor 1300.

Many particular encoding patterns in ancient texts, scrolls and scriptures fine structure the 1300 day count as a various interwoven count of time and in utility of the Ancient Year of 360 degrees as Mayan Kin. Setting a Time as 360 days will define 7 such Times as $7 \times 360 = 2520$ days and will set $3\frac{1}{2}$ Times as 1260 days 'shortened' or fractalized in the factor of 15 as the 1 Hour in a Day of 24 Hours being equal to 15 Days in a Year of 360 Days. In this proportionality, 7 full days or a week of 7 days can so be defined as a 'shortened time' for a 'normal time' of 168 hours as 84 hours of daytime and 84 hours of nighttime and the 'day for a year' principle described in the encoding pattern and definitions. Other encoding keys engage various fine structures based on the 1300 day count and include the variations of $1300 = 1260 + 40 = 1290 + 10 = 1335 - 35 = 1335 - \frac{1}{2} \{70\} = 2300 - 1000 = (2670 - 370) - 1000 = (2 \times 1335 - 370) - 1000 = (1335 + 1600 - 265 - 370) - 1000$ and $7\frac{1}{2} = \frac{1}{2} \{15\} = 12,000 / 1600 = 300,000 / 40,000 = 144,000 / 19,200$.

1300 days form the timeframe for the Mayan fractal as related to the synodic month of the moon and so the metonic chronos of calendars used by any culture counting time in the lunar phases of the Moon, such as the Hebrew calendar and various indigenous or native cultures of regional affiliation.

In particular the Mayan Tzolkin repeating in $5 \times 260 = 1300$ Kin serves to define this calendrical calibration in a simple counting of the phases of the moon within this count of days.

As 1300 is a fractal of the completed precessional cycle as 65 Baktuns as $5 \times 13 \times 144,000 = 7200 \times 1300$ Kin; 1300 Kin form the minimized fractal for the total precessional day count in $720,000 \times 1300 = 9,360,000$ or $720 \times 13 = 72 \times 130 = 9360$.

To encompass both the 260 Kin of the Tzolkin and the 365 Kin of the Haab the 9,360,000 Kin the total Kin count is partitioned into $12 \times 780,000 = 13 \times 720,000$ Kin for a 'galactic month' differential of 60,000 Kin calibrating 25,644 Haab as $25,644 \times 365 = 9,360,060$ Kin with $5 \times 12 = 60$ Kin added to the total precession count of a renewed or reborn Mayan Eon.

This Mayan rebirth so is defined in the 1st Tun of the New Mayan era in 9,360,360 Kin and defines the lunar calibration of the last and final 1300 Mayan fractal specified in 89 lunar phases beginning and ending in a count of 45 full moons and encompassing 44 new moons in 44 lunations as in 44 synodic months of $29.530588 \times 44 = 1299.346$ days.

The 'Schwenger Moons' for the rebirth of the Mayan Precessional Kin count from 01Mar23,615 BC to 21Dec2012 AD to 16Dec2013 AD -52.0.0.0.0 to 13.0.0.0.0 to 13.0.1.0.0.0

A December 21st, 2012 date as the completion of a 13.0.0.0.0 Mayan precessional day count in 13 Baktun has become an accepted calendrical nexus of historians and other researchers like Jenkins, Arguelles and Calleman. This date of transformation in the time count of the Maya then indicates a

resetting or birthday for a new Starhuman consciousness akin a spiritual baby being born in multidimensionality. This statement therefore can be related to a number of prediction, sayings and prophecies such as the arrival of world teachers, avatars and similar heralds of changing times, such as the 'bearded teachers' of the Yucatan and of messiahs in the world religions; say Jesus of Christianity; Moshia/Shiloh of Judaism; Kalki of the Hindu; Mahdi/12th Imam of Islam as well as the Great White Brother of the Hopi or Kukulcan of the Maya or Quetzacoatl of the Aztec as a Plumed Serpent.

A decoded timeline in the Book of Revelation in the New Testament of the Christian bible specifies the Mayan 13.0.0.0.0 Ahau date of December 21st, 2012 ADG from the Tzolkin as an important date and as a time of a rebirth, following a 265 day gestation and ending a 1600 day period of birth as the sum of $1335+265=1600$ days or Kin. This book describing the Christian apocalypse as the revealing of the hidden mysteries of God codes the 1600 day period as an 'outer court', not to be measured in the context of many other scriptural encodings, such as found in the Book of Daniel in the Old Testament and Masoretic Torah, {Rev.11.1-2; 14.20 with Dan.12.7-12}. The Mayan 13.0.0.0.0 time marker so relates the scriptural encoding to a change of cyclic time in interwoven timelines such as used by calendars in the form of days and months and years, baktuns, katuns, tuns, uinals, kin and precessional eons.

A particular time loop is used by the Tzolkin comprised of 260 kin as 5×52 kin, the factor 52 describing 52 Haab years of $52 \times 365 = 260 \times 73 = 18,980$ kin with a common factor relating the Mayan Haab to the Mayan Tzolkin as a subset of its greater product of $260 \times 365 = 94,900 = 5 \times 18,980$. The factor 5 so becomes associated with 5 great precessional ages, each containing $5 \times 13 = 65$ baktun ages for 5 baktuns of $5 \times 144,000 = 720,000$ kin nesting a baktun of 144,000 days or kin, again relating the Mayan chronos to scriptural encoding and inclusive of the measurement of the 'inner court' as a New Great City Jerusalem Earth {Rev.7.4-8; 14.3 and 21.16-17}.

Applying this factor of 5 to the 260 kin of the Tzolkin as $5 \times 52 = 260$ then defines $5 \times 260 = 1300$ kin as the embedding of 5 Tzolkin cycles within 1300 days approximating any lunar calendar in 44 synodic lunar months as $29.530588 \times 44 = 1299.346$ days or kin. An Ahau date occurs once every 20 days - thus 1300 days contain 65 Ahau dates in $1300/65 = 20$ as 5 cycles of 260 days as $5 \times 13 \times 20 = 5 \times 260 = 1300$ days. 65 Ahau Kin so fractalize the 65 Baktun cycles of the entire precessional calendrical cycle of $65 \times 144,000$ Kin.

The initiation of the first tun as 360 kin in the rebirth or resetting of the Mayan Long Count calendar in Maya date 13.0.1.0.0 in the day count 9,360,360 then can be utilized as a 45th boundary lunation as a 45th Full Moon in a sequence of 44 New Moons bounded by 45 Full Moons as 89 Moon phases for a 1300 kin Maya-Hebrew-Metonic calendar calibration.

This can be tabulated as the 'Susan Schwenger Moons' describing lunar phases as Full Moons and New Moons from a first Full Moon on May 27th, 2010 to the last Full Moon on December 17th, 2013. The 45 or $90-1=89$ 'Schwenger Moons' so define the 5 Tzolkin cycle of 1300 kin as the calibration of two Mayan Ahau dates.

The Mayan Tzolkin of a 260 day count becomes synchronized with 365 days of the Mayan Haab in the Long Count of the calendar round.

The lowest number of days, which factor both $260 = 4 \times 5 \times 13$ and $365 = 5 \times 73$ is the number $18,980 = 73 \times 260$, just under 52 Gregorian (Common or Civil) years and exactly 52 Haab or Mayan years. Those 52 years so began as $13 \times 4 = 52$ Haab as the first of 13 Baktun of $1,872,000/13 = 144,000$ days or 394.5205 common

years from Mayan date 12.0.0.0.0 as 5Ahau 13 Zotz on September 18th, 1618 Gregorian as September 8th, 1618 Julian and as 28Elul53787 Hebrew to December 16th, 2013 Gregorian as December 3rd, 2013 Julian as 13Teveth5774 Hebrew and precisely 73 Tzolkins from 5Ahau 13Zotz as 13Ahau 18Mac as 13.0.1.0.0.

1618 was the year Johannes Kepler confirmed his discovery regarding the geometry of planetary orbits as circular and elliptical about a solar focus; therewith refining an older geocentric description of a planetary Earth centered star system by a heliocentric Sun-based cosmology (March 8th to May 15th).

The significance so becomes the matching of two 13 Ahau Dates in the following details of subtracting 52 Haab, that is a Full Calendar Round of 18,980 Kin from the alignment with the 45 Full Moons and the 44 New Moons of the 1300 Kin. Those two dates then crystallize from the Tzolkin-Haab synchronization as 12.19.17.7.0 13Ahau 13Zip and May 26th, 2010 as the lower boundary for the 1st Schwenger Full Moon in Scorpio of May 27th, 2010 and the 89th Schwenger Moon as the 45th Full Moon in Gemini of December 17th, 2013 or 1Imix 13Pax as the upper boundary for 13Ahau 18Mac on December 16th, 2013 as 13.0.1.0.0.

265 Days of Pregnancy for the birth or rebirth of a 'new precessional era' until December 21st, 2012; with 360 days of a Mayan Tun or Platonic Degree Year so assigns a 'Circular Key' of the 'Ancient Year' to the Full Moon of December 17th, 2013 as December 4th, 2013 Julian and 14Teveth5774 Hebrew in Mayan date 13.0.1.0.1 1Imix 19Mac to complete the preceding Maya era of an 'Old World' and converges to the timeline of the Universal Logos and parallel time frames and encoding patterns for a 'New World' time frame. This date coincides with the Mayan New Moon/Full Moon Count of 1300 Days or Kin as tabulated.

A Science of Time Encodings and a Mayan Calendar Mythology for a World in Transition

The symbol of the Maya at the center of the Milky Way galaxy is known as Hunab Ku as 'Mover of all things' and depicting a galactic butterfly across the worlds changing from darkness to light in cycles of time.

The Maya named the galactic Center Hunab Ku - the 'Giver of all Life and Measure' and called the 'Pathway from the Earth to Hunab Ku' as 'Kuxan Suum - the Umbilical Cord between Earth' as the Universal Mother and its Galactic Father-Mother.

At the center of Hunab Ku resides a dualized supermembrane manifesting as a multi-dimensional wormhole core connecting a Black Hole 'Mother'-Sink-Source to a White Hole 'Father'-Source-Sink. One can describe the cosmology as a White Hole negative-yang-male charge primary source-sink energy powering a Black Hole positive-yin-female charge secondary sink-source energy.

The characteristic negative charge can be said to originate from a nospace and notime realm, albeit defined mathematically as an unphysical negative- or imaginary space. A physically real space and time so can be defined in the logistical argument of relating the real spacetime of a positive space to an imaginary spacetime of a negative space.

A self-referential or quantum relativity between two observers; one of each located in either the negative-imaginary or positive-real worlds or realms can so become established.

The observer within the negative spacetime considers hisher world as real and considers the observer situated within the positive spacetime as imaginary or as a virtual reality or image of herhimself. The premise of location therefore defines perceived reality for both of the observers arbitrarily, irrespective of how their original frames of self-references are defined or agreed upon.

To poetically color or mythologize or anthropomorphize this essay, the duality coupled supermembrane at the core of the Milky Way galaxy as the Maya's Hunab Ku or 'Giver of all things' can be renamed as Abba – the little serpent (Quetzalcoatl aka Kukulcan aka Gugumatx aka Manitou aka Great Rainbow Dragon-Membrane Baiame etc. etc.).

The symbol of the 'Cosmic Dragon' or Ouroboros as the Mazzaroth or Great 360° Circle of the Zodiac Sky symbolizing the mapping of the Egyptian Nile from the Milky Way Galactic path is translated from the binary code of the Mathimatia in the zero cipher 0 linearized as the unity cipher 1 in a form of modular quantum geometric duality and mirroring the transformation of the superstring classes from a 26-

dimensional {A-Z or alpha-omega or beginning-end}Bosonic closed superstring spectrum into a distribution of both closed and open superstring classes; the open superstring classes then relating to their attachment to lower dimensional Dirichlet branes from their higher dimensional origin, such as superstring class I.

This can be defined as an algebraic-topological Unitary Circle Group or $U(1)$ relating the closed 'non-gauged' 26 bosonic integer dimensions to 26 open $U(1)$ -gauged bosonic integer dimensions subsequently differentiated in the unit circle in clockwise and anticlockwise chirality and rotations and in 10 right handed or clockwise superstrings and 16 left handed or anticlockwise bosonic strings comprising the 26 bosonic string dimensions. In 11-dimensional M-theory, the non-gauged nature of the original 26 dimensional closed Bosonic string is reestablished to algebraically-topologically close the spectrum of the 10-dimensional superstrings as a 2-1 from 11-10 dimensional reduction and modular quantization.

This treatise so will include the metaphor of the 'dragon-membrane space' as descriptor for the supermembrane quantum geometry as a basis for the applicable quantum cosmology; also based on the fundamental geometry of one-sided surfaces such as the Möbius strip as a non-orientable manifold with a boundary as representative for the 2-brane in 11-dimensional membrane spacetime. It is the one-sidedness of the Möbius strip and its transformation into a non-orientable one-sided Klein-Bottle topology without boundary and which enables a surface without a thickness to transform into a 3-dimensional brane or volumar representative of the 4-dimensional spacetimes in cosmological models. This transformation requires the original one-sidedness of the 'Möbian Dragon' to become a quantum-geometric and quantum relative two-sidedness in the 'Klein-Bottle Dragon' in the emergence of the thickness of the third spacial dimension.

Abba's message is from negative spacetime to and relative to the positive spacetime; in which is embedded Baab, the 'Great Mother Sink-Source' in quantum relative entanglement with Abba as the 'Great Father Source-Sink'.

Hunab Ku so activates as a multi-dimensional galactic communication portal throughout the galaxy, albeit focused on a particular Black-Holed or 'Schwarzschilded' planetary location named Earth within a relay station known as a sun-planet-moon star system.

The dominant star or sun in that triple system becomes an ambassador-portal for Abba and the dominant moon or satellite relative to Earth becomes an ambassador-portal for Baab.

Abba, measuring the distance between Hunab Ku and the center of Earth as 9,360,000 sunset-sunrise cycles or lightened days so decides to send a message to Baab and a message which would require 9,360,000 light days to reach Earth from the center of the galaxy.

A calibration of Earth's annual sojourn around the Sun as 365.2425 light days with the count of sunsets so can establish a particular Mayan Kin-Calendar for the 9,360,000 Kin-Days as synchronizing the distance between Hunab Ku and Earth with the timeframe for light and Abba's message for Baab to reach the Black Hole at the center of the Earth.

$\aleph = 5 \times 13 \times 144,000 = 9,360,000$ lightened days for $\aleph(60)(60)(24)(300,000)\text{km} = 242,611.2$ Trillion km or 25,626.8096 light years for $\aleph = 25,626.8096 (365.2425)$ 'civil-Gregorian' years.

This calibration defines the emission and reception of Abba's message for Baab as March 1st, 23,614 BC and December 21st, 2012 in a proleptic-backdated and current calendar day-kin count respectively. In the Mayan calendar those day-kin counts are named as 3Kayab 4Ahau = -52.0.0.0.0 3Kankin 4Ahau = 13.0.0.0.0 respectively.

The purpose of the message would be to prepare the life on the planet Earth to prepare for a galactic synchronization coinciding with a graduation of the human civilization evolving on Earth in a metamorphosis from its human and planetary basis towards a star human and star-galactic foundation.

After Baab had received Abba's message at the center of the Earth; the planned metamorphosis to graduate the human civilization into a 'new timed' evolving star human civilization could begin.

24 Hours = 360°
1 Hour (h) = 15°
1 Minute (m) = 15'
1 Second (s) = 15"

A Spherical Bubble of Diameter $R_{\text{Sirius}}=8.5828$ lightyears will have its Center in the Centauri System at $R_{\text{Centauri}}=4.2914$ lightyears and as observed relative to an observer from the Earth as the distance between Sirius and Gaia-RahSol say as the Northpole and the Southpole of this spherical bubble.

A message sent from Sirius to the RahSol receiver so will effectively encompass the journey of the same data stream between Sirius and the Centauri midpoint, as well as a roundtrip between Gaia-RahSol and the Centauri star system in a lightpath between 8% and 9% years.

Centauri Starsystem: {0.4011+0.5989=1 for Proxima-Nexus-Alpha}

Distance= $R_{\text{Centauri}}=4.2421 - 4.2914 - 4.3650$ lightyears

Right Ascension: $\alpha=14\text{h } 29\text{m } 43.0\text{s} - 14\text{h } 33\text{m } 41.05\text{s} - 14\text{h } 39\text{m } 36.5\text{s}$
 $=217^\circ 25' 45'' - 218^\circ 25' 15.7'' - 219^\circ 54' 7.5''$

Declination: $\delta = -62^\circ 40' 46'' - -61^\circ 56' 21'' - -60^\circ 50' 02''$

Given the spherical (α, δ, R) coordinates of a star, the corresponding rectangular (X, Y, Z) coordinates may be computed from:

$$\begin{aligned} X &= R \cdot \cos(\alpha) \cdot \cos(\delta) \\ Y &= R \cdot \sin(\alpha) \cdot \cos(\delta) \\ Z &= R \cdot \sin(\delta) \end{aligned}$$

Because by the Pythagorean Theorem:

$x^2+y^2+z^2=R_{\text{Star}}^2$ for $x=r\cos\alpha$, $y=r\sin\alpha$
and $z=R_{\text{Star}}\cos(90^\circ-\delta)=R_{\text{Star}}\sin\delta$ for
 $\cos\delta=\sin(90^\circ-\delta)=r/R_{\text{Star}}$ for $x^2+y^2=r^2$

8.5828 lightyears = 3134.72 days as July 21st, 2021

9.4086 lightyears = 3436.14 days as May 19th, 2022

all from December 21st, 2012 with 4 years = 1461 days

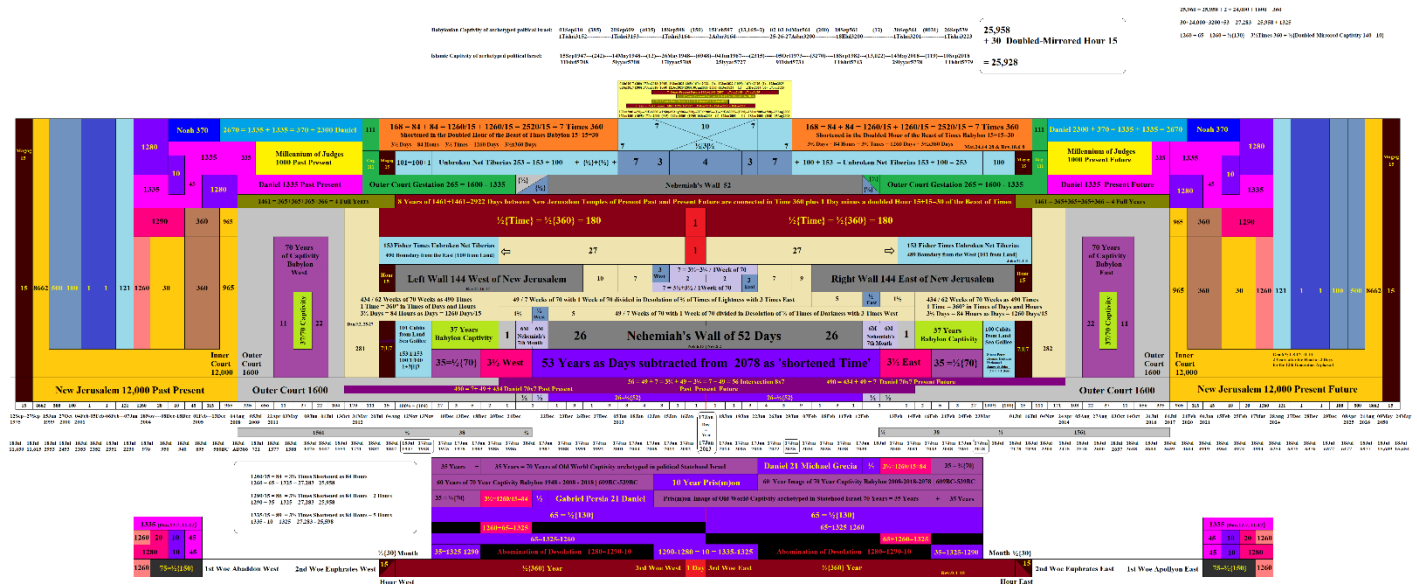

The examinations, occurrences and interpolations required for graduation would engage various cyclicities and reckonings of time as stipulated by the quantum entangled ancestors and descendants of the terrestrial humans in their galactic and intergalactic-universal family associations and partnerships.

The major timeframe for graduation would however be bounded by 13 years from 2012 to 2025 in an intensification and focusing on the evolving consciousness and perceptive ability of the human acolytes, aspiring towards its star human status of renewal.

Abba's yanged membrane message to yined membraned Baab from the imaginary negative spacetime relative to the real positive spacetime so was also a letter to the common family on Earth as the cosmic-universal children and inheritors of a promised starry legacy.

Setting the beginning of the 'Age of Aquarius', transiting from the previous 'Age of Pisces', at the solar transit from the star sign of Benoni Benjamin Pisces into the star sign of Manasseh Joseph Ephraim at January 20th, 1998 06:46UCT; defines a midpoint calibration of 13,780 kin-days in March 11th, 1979 + 6890 Days = January 20th, 1998 + 6890 Days = December 1st, 2016.

The 'Sacrifice of Years as Days' as a 'Daily Sacrifice' of Times Divided 25,960 Days of Universal Captivity within 27,283 Years of Precession

The Galactic Synchronization and the Age of Aquarius

The Galactic Alignment of the Ouroboros with the Warp zone of the Gaian Metamorphosis by the Cosmic Logos of the Serpent-Tamer Ophiuchus from October 5th, 26AD to December 21st; 2012 to December 17th; 2013 in $13,600+360 = \text{Days}$.

The Mayan master timeline spans five great cycles of long counts; each long count being comprised of 13 baktuns, each baktun encompassing 144,000 kin or days, and as 20 katuns of 7,200 kin each. It is the 65th and final baktun, which defines the 'birth of the starhuman' archetype to replace the older 'human' archetype initiated $5 \times 13 \times 144,000$ kin or 9,360,000 days before the nexus date of December 21st, 2012.

As the sun's angular diameter is about 0.53 degrees, the Maya calculated the ending of their long count in the last cycle of the winter-summer solstices as a function of the Mayan Precessional 'Great Platonic Year' of 25,626.81 cycles (or civil Gregorian years).

5,626.81 years so describe 12 subdivisions of 2,135.6 years each as $12 \times 780,000 = 9,360,000$ or 13 subdivisions of 1,971.3 years each as $13 \times 720,000 = 9,360,000$.

More precisely, the dates can be ascertained as ranging from $5 \times 156,000 = 780,000$ KIN to $5 \times 144,000 = 720,000$ KIN. Each 780,000 day cycle is then associated with a 'galactic month' or 'galactic tribe' or 'galactic star sign' in a subset of a 144,000 day Mayan Baktun.

A precessional degree then becomes $9,360,000/360 = 26,000 = 71.1856 \times 365.2425$ days and so in the Mayan kin count, 71.1856 civil years specify a 1-degree precession and the galactic synchronization at the winter solstice will be $71.1856 \times 0.53 = 37.728$ civil years or $13,780 = 13,150 + 630 = 13,150 + \frac{1}{2}\{1260\}$ 'Mean Solar Days' for the solar transit across the galactic center.

The 37.728 Gregorian 365.2425 Years defined as $13,780 = 13,150 + 630$ Mayan Kin, then are calibrated as exactly $9 \times 1461 = 13,149$ Days as 9 full leap-year cycles ($3 \times 365 + 366$) or as 36 Gregorian years as 36 Haab to which are added 9 Leap-Kin as $36 \times 365 + 10 = 13,140 + 10 = 36 \times 365.25 + 1 = 13,150$ and with the additional day counting the boundary of such as a week of 8 days from Sunday to Sunday or Sabbath to Sabbath or Mirror of Time to Mirror of Time.

This 'boundary day' is encoded as the 'Day and Hour and Time of the Lord' in various ancient texts and scriptures, such as in Revelation.17.11, associated with the 'beast rising from the sea as a mirror', that was and is and is not, yet being of the seven.

Those 36 Years are counted twice in conjunction with the Platonic Change of the Age from Aries to Pisces in the relative past to the next change from the Age of Pisces to Aquarius and so using the March Equinox applicable to the last of the 13×65 Baktun divisions; namely as the 720,000-780,000 days or 1971.293-2135.567 years from October 5th; 26 AD to January 20th; 1998 in the Gregorian (proleptic) Calendar.

As the difference between 1998 and 1971 approximates 26 Years; the common calendar of (B)efore (C)hrist and (A)nno (D)omini is assigned the 36 Years = 5 BC-Years + 31 AD-Years = 31 Years + 5 Years as 37.728 years from 7 BC to 32 AD and in $13,980 = 13,780 + 200$ Kin) and to correlate or mirror the 13,780

days of the Pisces-Aquarius Transit to the Aries-Pisces Transit.

Assigning the time unit of a watch or 6 hours as a quarter cycle as 90 degrees of a full cycle of a day as 12 hours and a night of 12 hours in the 'shortening of time' then 'lengthens' the 'shortened time' in the 24 Hours as 360 Day principle by the factor 15 in four 630 day periods to the full Platonic Age Transitions to then satisfy particular encoded (prophetic) condition about the 'end times' being defined in two $3\frac{1}{2}$ cycle periods and which are scripturally defined in a Cycle of a Time being 1 Mayan Tun or 360 'degree days' in a circle.

The cycle of a Week or 'Seven' then become 7 Tun = $7 \times 360 = 2520$ Kin or $1260 + 1260 = 4 \times 630 = 8 \times 315$.

In particular two $3\frac{1}{2}$ days become a week of 7 days in the 13th star sign of Ophiuchus-Quetzacoatl-Kukulkan-Hermes Trismegistus-Thoth=... in the zodiac of the constellations with Ophiuchus specifying the annual solar transit from Scorpio into Sagittarius at the 240 degree cusp of the circle of the zodiac or Ouroboros also known as the River Hiddekel in Gen.2.14 with Daniel.10.4 and the River Nile of Egypt and the Galactic Milky Way. The Maya named the galactic Center Hunab Ku - the 'Giver of all Life and Measure' and called the 'Pathway from the Earth to Hunab Ku' as 'Kuxan Suum - the Umbilical Cord between Earth' as the Universal Mother and its Galactic Father-Mother traversing the celestial sky as a projection of the River Nile into the starry heavens.

As the 13th star sign of the Universal Mazzaroth is given by a cusp or solar transit between two 30 degree sectors and specifically at 240 degrees, the annular solar transit of the sun from the sector of Asher Scorpio into the sector of Issachar Sagittarius in the year 26 AD will define the manifestation of the Age of Pisces within the 12th 720,000 Kin cycle of the Great Mayan precession of 26,000 Circle-Degree days duration. This nexus will subtract 60,000 Kin from the usual 780,000 Kin from the 12-tiered partition of the Mazzaroth or Ouroboros to define the 12th sector of the House of Pisces Benjamin not as a 12th house but as a 13th house of 720,000 Kin or 5 Baktun of 144,000 Kin.

The Ophiuchian Solar Transit which initiates the Age of Pisces occurs on November 21st, 26 AD GP as November 23rd, 26 AD J as 24Kislev3787 Hebrew at 16:45UCT $\mu\theta\pi-0^\circ$ and as the Mayan date 7.19.4.17.18 = 2Etnab 16Xul with the individuation of Ophiuchus Serpent Tamer in the personification of the Universal Logos as Jesus Ben Abba and preparing the 'anointment' or baptism on August 4th, 28 AD J as August 2nd, 28 AD GP and as 24Av3788 Hebrew for Mayan date 7.19.6.12.18 11Etnab 6Pop and $719,953 = 720,000 - 47$ days before the solar transit from Zebulon Capricorn into Joseph Aquarius at 06:46UCT $\nu\sigma\omega\omega-0^\circ$ on January 20th, 1998 G as January 7th, 1998 J as 22Teveth5758 Hebrew and as Mayan date 12.19.4.15.11 = 2Chuen 9Muan.

Ophiuchus Serpent Tamer

In conjunction with the 'Venusian Transit of the Solar Disc' {8 years apart in 243-year cycles (121.5+16+105.5=243) and manifesting June 7th, 2004 to June 5th, 2012 in the present Logos timeline { http://en.wikipedia.org/wiki/Transit_of_Venus }, the Maya obtained the long count from the 'hermetic' tradition (of the Plumed Serpent Melchizedek) of Kukulcan (or Quetzalcoatl in the Aztec parallel) and this 'prophecy' relates directly to a scripturally encoded 'day count' of 12,000+1,600=13,600 days in a 'furlong' count of measuring the 'inside' and the 'outside' of the 'great city' {John.2.21; Revelation.11.1-2; 14.20; 21.16} as the 'Temple of God'.

In this code the 'Inner Court' of the 'Great City Earth' is measured as 12,000 furlongs and the not measured 'Outer Court' of the 'harvest and reaping of the Earth' is coded as 1600 furlongs. The ratio between the Inner Court to the Outer Court so translates as the characteristic electromagnetic base frequency of Earth in its light path or speed of light divided by its geometric perimeter: $300,000 \text{ [km/s]} / 40,000 \text{ [km]} = 7.5 \text{ Hertz}$.

Perimeter of the Earth at Surface Mirror of Reflection = 40,000 km

Perimeter = Wavelength λ = Lightspeed c /Frequency f

Perimeter = $\lambda = 2\pi R$ for Radius $R = \lambda/2\pi = 6,366$ km

S-Frequency = $c/\lambda = 300,000$ (km/s)/40,000 km = 7.5 Hz

$$X+Y=XY=E^{i\pi}=\cos[\pi]+i\sin[\pi]=i^2=-1$$

$$X=\frac{1}{2}(\sqrt{5}-1)=0.618033...$$

$$Y=-\frac{1}{2}(\sqrt{5}+1)=-1.618033...$$

$$Y^n = Y^{n-1} + Y^{n-2} \quad \text{Recursion}$$

$$X^3 = 0.236... = \sqrt{5} - 2$$

$$X^2 = 0.382... = \frac{1}{2}(3 - \sqrt{5})$$

$$X = 0.618... = \frac{1}{2}(\sqrt{5} - 1)$$

$$Y = 1.618... = \frac{1}{2}(1 + \sqrt{5}) = 1/X$$

$$Y^2 = 2.618... = Y + 1 = \frac{1}{2}(3 + \sqrt{5}) = 1/X^2$$

$$Y^3 = 4.236... = Y^2 + Y = \sqrt{5} + 2 = 4 + X^3 = 1/X^3$$

Revelation. 6.6 & 14.20 & 21.16-17 - KJV

7.83 - 7.50 = 0.33 = $\frac{1}{3}$ "Barley of the Balanced Reaping"

7.5 - 6.5 = 1 "Penny of the Balanced Reaping Harvest"

$$(X+Y)^n = 1 = (XY)^n$$

for $R = 6,098$ km at a Depth of 268=265+3 $\frac{1}{2}$ km as 'Gestation Days'

The Great City Old Jerusalem New

These 13,600 days from December 21st, 2012 to September 27th, 1975 specify a 37.728 civil year period of 13,780 days, in adding 180 days as the angular halving of 360 degrees of a circle in 180 days and as say the period between the two equinoxes in March and September or as the 180 Degrees between the two solstices of June and December, each 6 months apart in the assignment of the seasons.

Those 37.728 years as 13,780 days also specify a 'Cosmic Pregnancy' or 'Universal gestation' of 265 Kin from March 31st; 2012 to December 21st; 2012 in the partition of 13,780 = 12,000+1600+180 = 13,150+365+265 as the Platonic-Mayan Great Age Transition to which are added 1 Haab of 365 Kin and a 265=260+5 Tzolkin and 5 Kin Vayeb Kin period as a 265 Kin Gestation. The 'Universal Pregnancy' begins at the 2012-31=1981 year anniversary or return of the original Easter Sabbath-Sunday 'Resurrection' event of March 31st to April 1st; 31 AD-Julian reckoned in Julian time and so calibrates the 2-day divergence from the Gregorian calendar at that time.

The encoded '70-Year Captivity of Israel' as the 'Captivity of the '12 star-born Tribes of the Universal Galactic Human Family' is calibrated with this greater cosmic Mayan or ancient timeframe and the Hebrew and the Civil calendars of the 21st century. This calibration also incorporates a time warp of 725,184 days to mirror the Julian day count in use at the time of the transit of the eons from Aries to Pisces and so at the beginning of the 1st Century to the day count of the Gregorian calendar of the 21st Century $65 \times 144,000 / 13 = 720,000$ days or 1971 years to $65 \times 144,000 / 12 = 780,000$ days or 2136 years later as the change of the eon from Pisces to Aquarius.

The encoding key for this calibration is a 'long time as a short time' principle. A day of 4 watches, dividing the time of daylight from a time of darkness divides 24 hours into four periods of 6 hours, the first watch from 6pm sunset to midnight; the second watch from midnight to sunrise 6am; the third watch from 6am to noon and the fourth watch from noon to sunset 6pm the following day. A time of seven days or a week of sevens, then encompasses $7 \times 24 = 168$ hours or 28 watches and a half-week of $3\frac{1}{2}$ days becomes 84 hours or 14 watches.

Dividing this count of watches into days and nights, allows a super-positioning of 'times of the light of day' and 'times of the darkness of the night' however. Sunrise no longer follows sunset in a 24 hour period, should the cyclicity of the Time definition as 7 full days and 7 full nights be no longer measured in continuity. $7 \times 12 = 84$ hours of daylight become separated from 84 hours of darkness decoding the statement of 'three days of darkness' in Exodus.10.20-23 and related 'prophecies' or 'sayings'. This is found in codes, related to the destruction of one third of a time period such as 420 days within 1260 days or 14 months within 42 months or 28 hours within 84 hours as in Revelation.8 where 7 trumpets are assigned to 7 seals and 7 vials and 1 hour is divided into two halves to indicate the $3\frac{1}{2} + 3\frac{1}{2} = 7$ definition, dividing of a continuous reckoning of time into a dividing of time into continuous darkness, separated from continuous light. As one hour in a day of 24 hours is as 15 days within a 360-day year; a period of 'silence in heaven' of 'about half an hour' then defines a continuous two week period of 14 days divided into two weeks separated by a 'Day of the Lord' rendering one week of continuous darkness and one week of continuous light.

The Hebrew calendar specifies the Babylonian 70-year captivity of ancient Israel in 25,958 days from 1Tishri3152=01Sep610BC to 1Tishri3223=26Sep539BC from the Israelite king Josiah and the battle of

Megiddo to the end of Babylonian rule as a Median empire by Cyrus the Persian. The civil calendar specifies the Islamic 70-year captivity of modern Israel in 25,928 days from 1Tishri5708 =15Sep1947 to 1Tishri5779=10Sep2018. The difference between those two 'captivities' are two hours of 15 days each to bound the 'captivities' in the west of the time-relative past on the left side and mirror this boundary of time in the 'present time of the Lord' on the right side in the time-relative future in the east.

Adding two boundary days as times of the mirrored hour as encoded in the 'judgement of Babylon' in Rev.18.6-17 partitions the captivity of Old Jerusalem of $25,958+2 = 25,960$ days within the solar transit of the galactic time synchronization of 27,560 days in the difference of 1600 days of the 'not measured' 'Outer Court' of Old Jerusalem or the 'Old Earth'. $\frac{1}{2}\{27,560\} = 13,780$ days, so become the 'mirrored' or twinned $2 \times 37.728 = 75.457$ Years of the solar transit across the angular diameter of the Sun and as characterised by the annual December solstice of December 21st in the present Gregorian-Civil calendar.

The combined captivity of the universal starhuman civilization of 25,958 days so is divided into two halves of a measured 'Inner Court' for a 'New Jerusalem' as a 'New World' or a 'New Great City' or a 'New Earth', bounded in a 'Hour of the Lord' west-left and east-right with a not measured 'Outer Court' connecting the two parts of the 'New Jerusalem' in a 'Day of the Mirror of Divided Times'. The 'not measured' 1600 days of the 'Outer Court' and coded in the harvest and the reaping of the Old Earth so become 'counted' and measured in a reassignment of this 'harvest' as a period of pregnancy or gestation of the 'Great City Earth' in $1600 = 265+1335$ and for $1600+360+1600 = 3560 = 15+430+1335+1335+430+15 = \{\text{Hour}\}+\{\text{Egypt}\}+\{2670=2300+370=2520+150\}+\{\text{Egypt}\}+\{\text{Hour}\}$ and where Egypt 430 = Ezekiel Israel 390 Left + Ezekiel Judah 40 Right and where $3+1+3$ Times $360 = 1260+1260 = 2520 = 2300$ Daniel + 370 Noah and where Daniel's Blessing $1335 = 1260+30+45 = \text{Abomination}$ $1290 + 45$ with 5 Months of Noah's Flood as the 1st Woe of Revelation $150 = 2670-7 \times 360 = \text{'Cleansing of the Sanctuary by Flood'}$, coded in Dan.8.13-14 with Dan.9.25-27 and Dan.12.7-12 and in Gen.7.10-9.17 and Exo.12.40 with Eze.4.1-6 with Mat.24 and Rev.9 and Rev.14.

$15+12,000+1600+53+1600+12,000+15 = 15+13,600+53+13,600+15 = 27,283 = 25,958+1325 = 25,958+1260+65 = 25,958+1290+35 = 25,958+1335-10$ and as $65=5 \times 13$ as the Mayan Baktun count as $\frac{1}{2}\{130\} = \frac{1}{2}\{360-100-30\}$ and the Abomination of Desolation 1290 truncated into 10 Days of imprisonment as $10 = 1290-1280=1335-1325$ coded in Rev.2.10.

$53 = 46+3+1+3$ days are taken from 8 weeks or 56 days as 'cut off' nexus for 70 weeks or 490 days encoded in Dan.9.24-27 to define the partitioning of the 70 weeks into $7+62+1$ week, the one week being halved to indicate the 'Day of the Lord' as the overall midpoint or 'mirror of divided times' day where the 'sacrifice of the days as years ceases on January 17th, 2013 Gregorian or 6Shevat5773 or Mayan date 13.0.0.1.7 10Muan 5Manik.

A 46-year construction of the 'Temple of Jerusalem' associated with a $3\frac{1}{2}$ day time period of destruction encoded in John.2.20 so becomes decoded in the addition of 3 days as a half-week to 53 days to complete a 7 week period of 49 days as a tenth of the 490 day period coded in Rev.11.13 and 2Pet.3.8 for 7 days coding for 7000 years as 7 times.

The 7th day dividing a week of seven days into two halves then defines the 'Day of the Lord' as a discontinuity of successive days and nights and so encodes the construction of Nehemiah's wall of 52 days as being divided into two halves of 26 days in the 'Day of the Lord' as a timeline discontinuity in Neh.6.15 as $26+1+26=53=46+7$.

$15+430+1260+30+45+45+30+1260+430+15 =$

$$12,000+1600+360+1600+12,000 = 13,780+13,780 = 27,560 = 12,015+\{430+1335\}+\{1335+430\}+12,015 = 27,283+277$$

The Hebrew Calendar is based on the Lunar Cycles of 29.530594... mean solar days from one New Moon to the next New Moon as a synodic month of 29.530588 days. The Hebrew Calendar engages a Metonic Calendar which aligns 235 synodic lunations with 19 solar years as a synodic month in $235 \times 29.530588 = 6939.68818.. = 19 \times 365.2467463...$ This then defines a Hebrew metonic solar year as 365.2467.. Years.

A tropical year measured from Equinox to Equinox is 365.2421988 days for an error of divergence of $\{0.2467463-0.2421988=0.0045475\}$ or $1/0.0045475$ as 1 Day in 219.90 Years from the metonic solar-tropical year used in the Hebrew calendar.

The error of divergence using the lunar chronos in the Hebrew calendar calculates as $\{0.530594-0.530588=0.000006\}$ or $1/0.000006$ as 1 Day in 166,666.7 lunar months or 1 Day in 13,888.9 Years.

The ancient scribes and astronomers of antiquity incorporated this divergence between a solar based time keeping and a lunar based chronos in observing the precessional cycle of the Earth. The calibration of calendars used by the Hebrews and Babylonians using the metonic cycle then can be blended and superimposed with solar-based civil calendars, such as the Julian and the Gregorian. It can also be encompassed by a simple count of days, such as the time keeping used by ancient cultures, such as the Maya.

In particular, the lunar month and the general error of divergence of 1 Day in 13,888.9 Years is found to underpin much of the encoding patterns as found in the Masoretic texts of the Torah and its derivative in the King James Bible.

This chapter then aligns the 5th great precessional eon of the Maya and their ancestors from March 1st, 23,615 BC to December 21st, 2012 AD as the count of 9,360,000 days or Mayan Kin being partitioned into $5 \times 13 = 65$ Baktuns of 144,000 Days each. 13 Baktun of $13 \times 144,000 = 1,872,000$ Kin so are nested within 65 Baktun totaling 9,360,000 Kin. As $9,360,000 = 13 \times 720,000 = 12 \times 780,000$ a precessional cycle can be partitioned into both 12 and 13 equal parts as a count of days. Using a Cyclic Year of Degrees as a Great Platonic Year of 360 Degrees as days; the precessional day count contains precisely 26,000 such 360 Kin years as $360 \times 26,000 = 9,360,000$.

Using the lunar month as natural initiation for the 5th great precessional eon for the human history from 23,615 BC to the present time under consideration; the Masoretic and scriptural encoding, represented in timelines crystallizes particular time markers and nexus markers described in the following tabulation and further discussed in this and other chapters found in this book.

Day of Mayan Precession Count	Tribal House Degree °/30°/Σ°/360 °	Precession Count in 12 30° Houses	Mayan Dates Haab/Tz olkin	Proleptic Gregorian Dates..... Julian	Hebrew Date	Commentary...

The Grand Mayan Cycle and the Creation of Homo Sapiens by the Ancients in 36,000 Galactic Moons of 1.872 Million Haab Years

The question for many researchers, historians, archaeologists and anthropologists has for long been, just how the Maya and similar cultures derived their calendrical calculations, using their astronomical observations with their experienced seasons upon planet Earth.

They realised of course, that the Tzolkin of 260=13x20 repeating cycles served some celebratory or 'spiritual' purpose, whilst the Haab of 365 Kin or days became the seasonal time keeper for the plantings and the harvests. The Haab is then evidently calibrated to the solar year, but the Tzolkin bears no immediate correlation with the lunar year of 354-355 days, except the Tun of 360 Kin becoming a midpoint between the approximate lunar year of $12 \times 29\frac{1}{2} = 354.3$ Days and the solar year of 365.25 days in $354 + 6 = 360 = 366 - 6$ in an averaging of the leap year cycles of $3 \times 365 + 366 = 1461$ days.

Mazzaroth is a Biblical Hebrew word (מַזְזָרוֹת *Mazzārōt*, LXX Μαζαροῦθ, *Mazourōth*) found in the Book of Job and literally meaning 'a garland of crowns' [1] but its context is that of astronomical constellations, and it is often interpreted as a term for the zodiac or the constellations thereof. [2] (Job 38:31-32). The similar word mazzalot (מַזְלוֹת) in 2 Kings 23:3-5 may be related.

The word itself is a hapax legomenon (i.e., a word appearing only once in a text) of the Hebrew Bible. In Yiddish, the term mazzalot came to be used in the sense of "astrology" in general, surviving in the expression "mazel tov," meaning "good luck." [3]
<https://en.wikipedia.org/wiki/Mazzaroth>

6th-century depiction of the zodiac, mosaic in Beit Alpha, Israel.

Astrological clock at Venice by Zachariel

The Earth in its orbit around the Sun causes the Sun to appear on the celestial sphere moving along the ecliptic (red), which is tilted 23.44° with respect to the celestial equator (blue-white).

Job 3:3-10 - King James Version (KJV)

8 Let them curse it that curse the day, who are ready to raise up their mourning.
 9 Let the stars of the twilight thereof be dark; let it look for light, but have none; neither let it see the dawning of the day:
 10 Because it shut not up the doors of my mother's womb, nor hid sorrow from mine eyes.

Job 38 - (KJV)

1 Then the Lord answered Job out of the whirlwind, and said,
 2 Who is this that darkeneth counsel by words without knowledge?
 3 Gird up now thy loins like a man; for I will demand of thee, and answer thou me.
 4 Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding.
 5 Who hath laid the measures thereof, if thou knowest? or who hath stretched the line upon it?
 6 Whereupon are the foundations thereof fastened? or who laid the corner stone thereof;
 7 When the morning stars sang together, and all the sons of God shouted for joy?
 8 Or who shut up the sea with doors, when it brake forth, as if it had issued out of the womb?
 9 When I made the cloud the garment thereof, and thick darkness a swaddlingband for it,
 10 And brake up for it my decreed place, and set bars and doors,
 11 And said, Hitherto shalt thou come, but no further: and here shall thy proud waves be stayed?
 12 Hast thou commanded the morning since thy days; and caused the dayspring to know his place;
 13 That it might take hold of the ends of the earth, that the wicked might be shaken out of it?
 14 It is turned as clay to the seal; and they stand as a garment.
 15 And from the wicked their light is withholden, and the high arm shall be broken.
 16 Hast thou entered into the springs of the sea? or hast thou walked in the search of the depth?
 17 Have the gates of death been opened unto thee? or hast thou seen the doors of the shadow of death?
 18 Hast thou perceived the breadth of the earth? declare if thou knowest it all.
 19 Where is the way where light dwelleth? and as for darkness, where is the place thereof,
 20 That thou shouldest take it to the bound thereof, and that thou shouldest know the paths to the house thereof?
 21 Knowest thou it, because thou wast then born? or because the number of thy days is great?
 22 Hast thou entered into the treasures of the snow? or hast thou seen the treasures of the hail,
 23 Which I have reserved against the time of trouble, against the day of battle and war?
 24 By what way is the light parted, which scattereth the east wind upon the earth?
 25 Who hath divided a watercourse for the overflowing of waters, or a way for the lightning of thunder;
 26 To cause it to rain on the earth, where no man is; on the wilderness, wherein there is no man;
 27 To satisfy the desolate and waste ground; and to cause the bud of the tender herb to spring forth?
 28 Hath the rain a father? or who hath begotten the drops of dew?
 29 Out of whose womb came the ice? and the hoary frost of heaven, who hath gendered it?
 30 The waters are hid as with a stone, and the face of the deep is frozen.
 31 Canst thou bind the sweet influences of Pleiades, or loose the bands of Orion?
 32 Canst thou bring forth Mazzaroth in his season? or canst thou guide Arcturus with his sons?
 33 Knowest thou the ordinances of heaven? canst thou set the dominion thereof in the earth?
 34 Canst thou lift up thy voice to the clouds, that abundance of waters may cover thee?
 35 Canst thou send lightnings, that they may go and say unto thee, Here we are?
 36 Who hath put wisdom in the inward parts? or who hath given understanding to the heart?
 37 Who can number the clouds in wisdom? or who can stay the bottles of heaven,
 38 When the dust groweth into hardness, and the clods cleave fast together?
 39 Wilt thou hunt the prey for the lion? or fill the appetite of the young lions,
 40 When they couch in their dens, and abide in the covert to lie in wait?
 41 Who provideth for the raven his food? when his young ones cry unto God, they wander for lack of meat.

Nehemiah 4:21-22 - (KJV)

21 So we laboured in the work: and half of them held the spears from the rising of the morning till the stars appeared.
 22 Likewise at the same time said I unto the people, Let every one with his servant lodge within Jerusalem, that in the night they may be a guard to us, and labour on the day.

Genesis 1:16 - King James Version (KJV)

16 And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also.

Deuteronomy 1:10 - (KJV)

10 The Lord your God hath multiplied you, and, behold, ye are this day as the stars of heaven for multitude.

Jeremiah 31:35 - (KJV)

35 Thus saith the Lord, which giveth the sun for a light by day, and the ordinances of the moon and of the stars for a light by night, which divideth the sea when the waves thereof roar; The Lord of hosts is his name:

Matthew 24:29 - (KJV)

29 Immediately after the tribulation of those days shall the sun be darkened, and the moon shall not give her light, and the stars shall fall from heaven, and the powers of the heavens shall be shaken:

Revelation 8:12 - (KJV)

12 And the fourth angel sounded, and the third part of the sun was smitten, and the third part of the moon, and the third part of the stars; so as the third part of them was darkened, and the day shone not for a third part of it, and the night likewise.

Acts 27:20 - (KJV)

20 And when neither sun nor stars in many days appeared, and no small tempest lay on us, all hope that we should be saved was then taken away.

Isaiah 14:11-13 - (KJV)

11 Thy pomp is brought down to the grave, and the noise of thy viols: the worm is spread under thee, and the worms cover thee.
 12 How art thou fallen from heaven, O Lucifer, son of the morning! how art thou cut down to the ground, which didst weaken the nations!
 13 For thou hast said in thine heart, I will ascend into heaven, I will exalt my throne above the stars of God: I will sit also upon the mount of the congregation, in the sides of the north:

2 Peter 1:19 - (KJV)

19 We have also a more sure word of prophecy; whereunto ye do well that ye take heed, as unto a light that shineth in a dark place, until the day dawn, and the day star arise in your hearts:

Revelation 2:27-29 - (KJV)

27 And he shall rule them with a rod of iron; as the vessels of a potter shall they be broken to shivers: even as I received of my Father.
 28 And I will give him the morning star.
 29 He that hath an ear, let him hear what the Spirit saith unto the churches.

Revelation 22:15-17 - (KJV)

15 For without are dogs, and sorcerers, and whoremongers, and murderers, and idolaters, and whosoever loveth and maketh a lie.
 16 I Jesus have sent mine angel to testify unto you these things in the churches. I am the root and the offspring of David, and the bright and morning star.
 17 And the Spirit and the bride say, Come. And let him that heareth say, Come. And let him that is athirst come. And whosoever will, let him take the water of life freely.

Amos 5:7-9 - (KJV)

7 Ye who turn judgment to wormwood, and leave off righteousness in the earth,
 8 Seek him that maketh the seven stars and Orion, and turneth the shadow of death into the morning, and maketh the day dark with night: that calleth for the waters of the sea, and poureth them out upon the face of the earth: The Lord is his name:
 9 That strengtheneth the spoiled against the strong, so that the spoiled shall come against the fortress.

Jose Argüelles and other 'Nova Mayans' then created a 28 day lunar cycle for a 'adjusted' Haab of 13x28=364 kin and called this the recalibration of 'Gregorian Solar' 12x60 time into a 13x28=364 'Mayan Lunar Time' also known as the Dream spell calendar. Any recalibration of Gregorian or 'western cultural' calendars is however not required, should the true nature of the original ancient calendars become understood and implemented to calibrate the ancient chronos with the time keeping utilized in the present era.

Jose' Arguelles dream spell calendar can then be related to the five Vayeb days ending a particular Haab in 1-5 Vayeb to begin the next Haab in OPop in an annual recurrence of July 26th. As such a calendar would eliminate the day count of a tropical year and so the seasons, however, say in the elimination of

the leap days in the common solar calendars and the metonic lunar calendars, such a procedure is not necessary.

Many researchers and interested readers are aware about the basic structure of the Mayan Long Count of 5 Baktuns as $5 \times 144,000 = 720,000$ Kin and the structure of a Baktun as $20 \times 7,200$ Katun for a Katun consisting of 20 Tun of 360 Kin each and with a 'Cycle Year' of 360 Kin being counted in $18 \times 20 = 360$ days for a Uinal of 20 days subdividing the 'Cycle' year as 360 degrees in a circle for a Tun being 18 Uinals.

The Mayan dates are defined and can be written as: {Baktun; Katun; Tun; Uinal; Kin}

The Precessional Maya Year or Grand Mayan Cycle or GMC also known as a 'Great Platonic Galactic Year', then is defined in $13 \times 5 = 65$ Baktuns or $65 \times 144,000 = 9,360,000$ Kin.

A fifth of this Mayan Grand Year then is used to calibrate the most recent calendrical time keeping of the Maya in the Maya date 0.0.0.0.0 = 8 Cumku 4 Ahau which calibrates to August 11th, 3114BC in a Gregorian proleptic (GP) and to September 6th, 3114 BC Julian calendrical calibration and synchronization.

Using those dates then will add a 5 Baktun day count of $5 \times 144,000 = 720,000$ Kin to 0.0.0.0.0 for 13.0.0.0.0 for December 21st, 2012 Gregorian.

Calibrating backwards in time to the beginning of the GMC then stipulates the 5 Baktun cycles as follows:

5th Baktun Cycle #5 of GMC #73 ends: 13.0.0.0.0 = 4Ahau 3Kankin = Friday, December 21st, 2012, Gregorian 'Civil Year' | Friday, December 8th, 2012 AD J | Friday, 8Teveth5773

5th Baktun Cycle #5 of GMC #73 begins: 0.0.0.0.0 = 4 Ahau 8Cumku = Monday, August 11th, 3114 BC GP | Monday, September 6th, 3114 BC JP | 11Elul647

4th Baktun Cycle #4 of GMC #73 begins: -13.0.0.0.0 = 4Ahau 8Zotz = Thursday, April 1st, 8239 BC GP | Thursday, | Thursday, June 4th, 8239 BC JP | Thursday, 15Iyyar-4478

3rd Baktun Cycle #3 of GMC #73 begins: -26.0.0.0.0 = 4Ahau 13Mol= Sunday, November 20th, 13,365 BC GP | Sunday, March 2nd, 13,365 BC JP | Sunday, 18Shevat-9603

2nd Baktun Cycle #2 of GMC #73 begins: -39.0.0.0.0 = 4Ahau 18Ceh= Wednesday, July 12th, 18,490 BC GP | Wednesday, November 29th, 18,490 BC JP | Wednesday, 21Tishri-14,728

1st Baktun Cycle #1 of GMC #73 begins: -52.0.0.0.0 = 4Ahau 3Kayab = Saturday, March 1st, 23,615 BC GP | Saturday, August 27th, 23,615 BC JP | Saturday, 25Sivan-19,854

As 720,000 Kin are 100 Katun and 2000 Tun as 5 Baktuns, the approximate precessional rate of change in the zodiac is attained as $5 \times 72^\circ = 360^\circ$ for 72 'Cycle Years' tracing One degree of the Ouroboros for a total precession of $72 \times 360 = 25,920$ 'Proxy years', approximating a Gaian precession across time spans of the order of 10s and 100 thousands of years.

As the rotational speed of a planet depends on its gravitational interaction with other orbs in the astronomical neighborhood (a receding moon will alter the gravitational interaction between the planet and the moon and affect the oceans in tides and currents) and also on the mass-inertia distribution of the planet's mass in its rotational dynamics in its 'Moment of Inertia'; the time keeping over such and longer periods of times cannot be exactly calibrated in terms of repeating cycles such as years in say a scientific definition for the length of a day and the duration of a second. However the count of days and nights, relatively independent upon fluctuations of the seasonal and orbital adjustments of such semi cycles remains constant for such a definition for the keeping of time.

The GMC can also be partitioned into an exact Kin count of 26,000 Kin for every Tun of 360 Kin as 1300 Katuns being $5 \times 13 = 65$ Baktuns.

$$26,000 \times 360 = 9,360,000 = 13 \times 720,000 = 72 \times 13,000 = 720 \times 1300$$

The actual precession rate for the present time of the 74th GMC then is $9,360,000 / (365.2425 \times 360) = 26,000 / 365.2425 = 71.186$ 'civil years' per degree. As the 'Civil Year' of 365.2425 days differs from the mean tropical year of 365.24219878 by 0.00030122 days per year; the cumulative error of divergence will become 1 day in so $1 / 0.000301$ or 3320 civil years. The actual Precessional year in scientific definition of the day count as presently employed is $9,360,000 / 365.2425 = 25,626.81$ 'Mean Solar Days' as 'Civil Gregorian Days' and a timed distance of about 25,627 light years descriptive for the distance between the Center of the Earth and the Center of the Milky Way or Perseus galaxy.

It was 73 Great Mayan Cycles ago, that the human presence upon the planet Gaia-Earth was made manifest by the cosmic elders of the realms. Many recall particular memories about this creation event and many misinterpret just what was the actual happenstance at that time marker in the cosmic evolution, relevant not only for the inhabitants of planet Earth, but for the entire universe defined in the parameters of space and time.

But it was at that time in geological time reckonings and 1.8 to 1.9 Million years ago (Mya); that the ancestor of Homo Sapiens or 'Modern Wise Man' diverged from its common hominid stock classified under such taxonomy as **Hominin Tribe** such as Australopithecus Afarensis; 'Lucy from the Sky' etc. and 3-4 Mya as ancestors of Homo Habilis (3-2 Mya) and evolution branches from a common **Hominidae Family** {Great Apes Human, Pongidae/Orang Utan, Gorilla and Pan-Chimpanzee/Bonobo 15-5 Mya}, themselves emergent from an earlier **Primate Order** to become what is known as **Homo Erectus** or 'Upright Man' in the fossils and records of anthropology. The oldest fossil of the **Genus Homo** in **Homo Erectus** is dated at 1.8 Million years from Georgia outside Africa and named **Homo Georgicus**. As Homo Habilis and Homo Erectus coinhabited the planetary environments; Homo Erectus co evolved with Homo Habilis, the latter becoming extinct and the former advancing into its Homo Sapiens and Homo Sapiens Sapiens form.

Modern Man or 'Cro Magnon Man' then characterised the final step of the human evolution at the beginning of the 73rd GMC and the transition period from the 72nd GMC into to 73rd GMC as the bridging time between two precessional eons of the Earth from the time of 'Edgar Cayce's Atlantis' beginning so 50,000 years ago to the time of the extinction of Homo Neanderthalensis or 'Neanderthal Man' so 30,000 years ago and when the 73rd GMC began to implement its 9,360,000 Kin or days.

<https://www.youtube.com/watch?v=naoknj1ebqI>

The reason for this number of GMCs is the deeper agenda of the Tzolkin and the Haab. The Tzolkin repeats in 260 Kin and the Haab adds 5 Vayeb or 'Special Kin' to the Cycle year of 360 Kin, the latter representing the average or mean alignments between the lunar cycles of the lunations and the solar

year of the seasons as indicated previously.

The Haab so repeats in 365 Kin and the Tzolkin repeats in 260 Kin and calibrating those two calendars will define the time keeping module and matrix as the 'Loom of the Maya' as envisaged by Jose' and Lloydine Arguelles Dream spell calendar and related artworks and endeavors.

The synchronization between the Tzolkin and the Haab so follows a precise mathematical procedure in the Kin count which assigns an integral number multiplier for the two calendars not only to 'meet' every $260 \times 365 = 94,900$ Kin of about 263.611 360 Day Cycle Years or Tuns, but also synchronizes this period of time as 4745 Uinals with the Tuns and Katuns and Baktuns of the GMC in a 'common factor'.

94,900 is factored as $949 \times 100 = 13 \times 73 \times 100$ in the prime Numbers 13 and 73 and this factorization directly allows the grand calibration of the timespan of a defined galactic starhuman or 'Mayan dragon' or 'plumed serpent' to manifest in its seedling or prototypical form of a Gaian Human or a Homo Sapiens.

$13 \times 73 \times 5 \times 144,000 = 73 \times 65 \times 144,000 = 4745 \text{ Baktuns} = 73 \times 9,360,000 = 73 \text{ GMC} = 683,280,000 \text{ Kin}$
 $683,280,000 \text{ Kin} / 365.2425 (-563.5) \text{ Civil Days} = 1,870,757.1 - 563.5 \sim 1,870,193.5 \text{ Civil years (with an error of about 563.5 days for this definition of a year).}$

The Kin count is however precise and counting backwards from 13.0.0.0.0 or Friday, December 21st, 2012 Gregorian will arrive at a Monday in 683,280,000 Kin or 1,898,000 Great Mayan Cycles or GMC's.

Jose Arguelles crystallized the Mayan 'Master Number' also known to the historians as pertaining to the calculus found in the 'Dresden Codex' 13665660 in his 'Mayan Factor' and this number is indeed one of a few numbers, which factor both the Tzolkin and the Haab in $1366560 = 260 \times 5256 = 365 \times 3744$.

{This number actually relates as a derivative to an even more primary number as an algorithmic derivative within a cosmogonic context descriptive of an universal cosmology or creation event in a Quantum Big Bang Cosmogenesis, indicated in an addendum following. The multiplier of 500 indicated below, also derives from an actual higher dimensional 'Star Charge' mapping the energy (spirit) from the higher dimensional super space into the lower dimensional forms of charge associated with inertia and therefore matter carrying the property of physical mass.} External link: <https://www.slub-dresden.de/en/collections/manuscripts/the-dresden-maya-codex/>

Numerically, one can write the 73 GMC's in the many partitioned forms, incorporating the Mayan Numbers as common factors between the Tzolkin and the Haab however:

$500 \times 72 \times 18,980 = 500 \times 73 \times 72 \times 260 = 73 \times 36,000 \times 260 - 500 \times 72 \times 52 \times 360 = 7,200 \times 260 \times 365 = 683,280,000$
 $5 \times 949 \times 144,000 = 500 \times 72 \times 18,980 = 500 \times 1366560 = 500 \times 73 \times 72 \times 260 = 2,628,000 \times 260 = 500 \times 72 \times 52 \times 365 = 1,872,000 \times 365 = 683,280,000 = 5 \times 73 \times 1,872,000 = 13 \times 365 \times 144,000$

The 73rd GMC so ended on December 21st, 2012 and on that Mayan date 13.0.0.0.0 the 74th GMC began to assign a 'New Cosmic Age' to the Homo Sapiens genetic seedling stock, which was genetically and electromagnetic inducted by monopolar or 'spiritual' induction by the Dragon Elders of the realms and at the time precisely calculated by the Kin count but approximated in any cumulative redefinition of this basic day and night count into any form of extended cycles such as years, such as approximating 1

Million 870 Thousand and 195 years ago from 2014.

The 74th GMC can also be said to restart the GMC count as GMC #0 and the Maya date 13.0.0.0.0 so proceeds as per the timeframe presently synchronized with a number of characterizing dates mirroring the last 73rd GMC in the resetting of the 74th GMC as a 1st GMC in a 'New World' of the Ancients and for the Ancients as their own Descendants and 'Extra-Terrestrial' Cosmic Family.

An 'Old Mayan Year' so becomes reset in a 'New Mayan Year' in the Synchronization between the Haab of 365 Kin and the Tzolkin of 260 Kin. This calibration participates precisely 36,000 GMC 'Galactic Moons', each of a duration of 18,980 Kin as 73 Tzolkins and as 52 Haab, the latter, which are 52 Civil Years minus 13 Leap-Days and characterizes a typical 'life span' or Mayan generation.

$$73 \times 9,360,000 = 73 \times 5 \times 13 \times 144,000 = 683,280,000 = 20 \times 360 \times 260 \times 365 = 500 \times 1366560$$

This can be expressed as a Fractal in using the 'Mayan Master number' $13366560 = 73 \times 65 \times 288$ in the product of the major Mayan multiplier 20 in the Kin count of 4 Haab approximating the Gregorian civil year without leap days:

$$\text{Mayan Fractal} = \text{MF} = 20 \times 73 = 1460 = 4 \times 365 = 73 \times 13 \times 144,000 / (360 \times 260) = 73 \times 1,872,000 / (93,600) = 136656000 / (360 \times 260)$$

This Mayan Fractal then becomes a Subset of the 36,000 Galactic Moons in the GMC and allows the Reset to specify a particular Fractal Interval in the $\text{MF} + 260 = 1460 + 260 = 1720$ Kin as 4 Haab + 1 Tzolkin.

The GMC is defined in 1.898 Million Tun or Grand Platonic Cycle Years in the 360 Kin count and being the same as 1.872 Million Haab in the 365 Kin count.

The GMC is then characterised in $4 \times 36,000 = 144,000$ Galactic Quarter Moons, each of a timespan of $4745 = 13 \times 365$ Kin as 13 Haab

The detailed transition from the Old Mayan Time beginning with the advent of the human genus Homo and initializing the last of 36,000 Galactic Moons on Tuesday, January 3rd, 1961 for Maya Date 12.17.7.5.0=3Kankin 4Ahau with $18,980 = 52 \times 365 = 260 \times 73$ Kin before the Mirror Nexus date of December 21st, 2012 13.0.0.0.0=3Kankin 4 Ahau to the first Galactic Moon in the New Mayan Time is presented following.

Requiem for a Human Civilization in the Creation of a Star Human Civilization

$$46,800,000 \text{ Days} = 325,000 \times 144,000 = 65 \times 144,000 \times 5000 = 5 \times 360 \times 26,000 = 5 \times 9,360,000 \text{ Mayan Kin}$$

$$365 \text{ Kin Haab} \times 52 = 18,980 \text{ Kin} = 260 \text{ Kin Tzolkin} \times 73 \text{ Maya Calendar Calibration}$$

Abba's Daughter de Baab

Queen of Dragons

of Gaia Serpentina Nova Terra

Venus Lucifer Aphrodite

I AM, We Are!

Father to Son = Grandfather

Mother to Daughter = Grandmother

Abstract Dream to Logos Reality

The Starry Legacy and Inheritance

Father-AbbaBaab-Mother

Old Adam—Eve Old

Son of Man—Daughter of Woman

New Adam—Eve New

Grandchildren of the Stars

December 8th, 2004 - December 8th, 2012

Just as Old Eve came out of Old Adam as a genomatrixed 'rib', so must Old Adam return into the womb of New Eve as the 'Body of the Cosmic Resurrection' to allow a cosmic metamorphosis in bisexual harmonisation and dragonomy encompassing the uniqueness of the individuality in the manyness of the dispensatory eucharist of the World Logos Twin.

Old Creation → Old God+Uncreated Goddess

→ Old God+Old Cosmos → God+Adam

→ Old Adam+Eve → Old Adam+Old Eve → Mankind+Cosmos

→ New Eve+New Adam → New God+New Cosmos

→ New God+New Created Goddess → New Creation

Old Daughter becomes New Mother Dam

Old Son becomes New Father Sire

One childless cosmic generation multiplies

RaHaR-TefnutShu-GebNut-ThothRenPtah

Finis Hominis Incere Hominidae Draconis Astrum!!!
"Humanity has ended, enter the Starhumanity of Dragons!"

The transformation of a type of cosmic civilization like that of the 'old humanity' residing on planet earth into a evolved cosmic civilization, say a 'new humanity' inhabiting a terraformed planet earth requires a period of transitional evolutionary adaptation.

This can be compared to the metamorphosis of the butterfly genus/family; order lepidoptera; class insecta; phylum arthropoda; kingdom animalia from the four stages of embryo-larvae-pupa-imago from the caterpillar-larvae stage into the butterfly-imago stage via the transit stage of the pupa-chrysalis ergo the cocoonsation of the caterpillar insectoid.

Elizabeth Morales

In the form of the genus homo, the subspecies homo sapiens sapiens can be modelled to have entered the embryonic stage with the advent of Cro Magnon Man so 26,000 (civil) years ago.

Using 400 year intervals of 146,097 days under utility of a certain calendrical counting of time ; the embryonic conception can be 'dated' to an extrapolated calendrical date of Saturday, February 21st, 23,615BC-G and precisely 9,360,008 days (and a precessional day count as 25,626.83149 Gregorian years) from Friday, December 21st, 2012AD in a week count of 1,337,144.

The Julian day count began on January 1st 4713 BC-Julian and the Gregorian day count of 365.2425 days per year commenced on October 5th, 1582, replacing the Julian year of 365.25 days.

A Mean Tropical Year has 365.24219 days and where a mean solar day has precisely $24 \times 3600 = 86,400$ SI seconds. The Tropical Year is referential to the seasons (equinoxes and solstices) and differs from the star-referential Sidereal Year in the day addendum $1/26000$ or 1.0000385 of so 1225 seconds (20.41 minutes) per year and which accumulate to about 368.5 mean days (and so about a year) per precessional cycle.

Due to orbital- and rotational changes and precession a year is decreasing at the present astronomical configuration by about 5 milliseconds/year or 130 seconds or so 2 minutes in a 26,000 precessional cycle.

The Gregorian year of 365.2425 days differs from the tropical year of 365.24219 days and so the Gregorian calendar will accumulate an error of about $0.00031 \times 26,000 \sim 8.1$ days per precessional cycle. To account for this, a 'creation-initialization week of 8 days' is added to the 64 cycles in $9792 + 8 = 9,800 = 7 \times 1,400 = 7 \times 7 \times 200 = 8 \times 52 \times 72 = 2(22 \times 52 \times 72) = 2 \times 702$ in the $13 \times 5 \times 144,000 = 9,360,000$ (Mayan) day-kin count, which so begins on the superposed and extrapolated Gregorian Day (G) Day#-7=Saturday,

February 22nd, 23,615BC-G and becomes mirrored in the 7th day Day#7=Saturday, March 8th, 23,615BC-G for the Conception of the human Embryo to be born from its Chrysalis 64 cycles later.

The first cycle is initiated on Day#9,792=Friday, December 21st, 23,589BC-G and the last and 64th cycle is initiated on Day#9,213,903=Friday, December 21st, 1612AD-Gregorian and ends precisely 146,097 days or 400 Gregorian years later on Friday, December 21st, 2012AD to commence a now precessional count in the birth of the Imago of the ancient human Embryo established by the beginning of the first cycle.

The correlation between the Mayan calendar and the Gregorian uses the Long Count of 1,872,000 days as 5125.362 Civil Years to specify a Platonic Great Precessional Cycle of 25,626.81 Civil Years as 5 Mayan Long Counts, each one designated by the Mayan epoch of 4Ahau and the Gregorian dates given in the table above. The partial year amounts to 295 days.

We can so now substructure this Great Platonic Mayan Year into 12 and 13 sub cycles. The 13-tier subdivision includes a 13th star sign in that of 'Ophiuchus, the Serpent Tamer' located as the Cusp of the Scorpio-Sagittarius solar transition dated on November 22nd/23rd in a Civil Gregorian Year.

Maya-Epoch $5 \times 13 = 65$ Baktun = $5 \times 13 \times 144,000$ Kin = $5 \times 1,872,000 = 9,360,000 = 26,000 \times 360$ Kin Gregorian Platonic Cycle as 26,000 Tun:

25,626.81 years so describe 12 subdivisions of 2,135.6 years each as $12 \times 780,000 = 9,360,000$ or 13 subdivisions of 1,971.3 years each as $13 \times 720,000 = 9,360,000$.

More precisely, the dates can be ascertained as ranging from $5 \times 156,000 = 780,000$ Kin to $5 \times 144,000 = 720,000$ Kin.

If we now 'personify' the 13th star sign of the Serpent-Tamer in conjunction with the 'Plumed Serpent' of the 'Office of Christ' or the 'Office of Melchizedek' or the 'Office of Hermes Trismegistus'; then one assigns the solar transit from Pisces into Aries and as the Spring Equinox of some 'personified' year as the change of one precessional age into another.

The ancient galactic Maya assigns the 'Birth of Ophiuchus' as the 'Birth of Christ' in the form of the historical Yeshuah Ben Joseph Bar Thomas Didymos to the equinox of the year 6BC and so 'fixates' the beginning of the 'Individuated' or 'Anointed-Messianic Initiator' or 'way shower' Age of Pisces as March 20th, 6BC or in Julian notation as the date and period of the Spring Equinox in that year and associated with particular conjunctions between the Moon with Jupiter and Saturn as celestial symbols for the land and people of the Jews and their neighbors.

Specifying this date then allows calibration of the entire precessional cycle into either 12 or 13 'Precessional Star sign Periods' as a super positioned Platonic Great Year onto the Mayan harmonics of the Tzolkin.

Luke 4:17-26 - King James Version (KJV)

17 And there was delivered unto him the book of the prophet Esaias. And when he had opened the book, he found the place where it was written,
 18 The Spirit of the Lord is upon me, because he hath anointed me to preach the gospel to the poor; he hath sent me to heal the brokenhearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised,
 19 To preach the acceptable year of the Lord.
 20 And he closed the book, and he gave it again to the minister, and sat down. And the eyes of all them that were in the synagogue were fastened on him.
 21 And he began to say unto them, This day is this scripture fulfilled in your ears.
 22 And all bare him witness, and wondered at the gracious words which proceeded out of his mouth. And they said, Is not this Joseph's son?
 23 And he said unto them, Ye will surely say unto me this proverb, Physician, heal thyself: whatsoever we have heard done in Capernaum, do also here in thy country.
 24 And he said, Verily I say unto you, No prophet is accepted in his own country.
 25 But I tell you of a truth, many widows were in Israel in the days of Elias, when the heaven was shut up three years and six months, when great famine was throughout all the land;
 26 But unto none of them was Elias sent, save unto Sarepta, a city of Sidon, unto a woman that was a widow.

The Birth of Jesus of Nazareth, the Star of Bethlehem and the Change of the Eons from Aries to Pisces in March-April 6BC

On Friday, 19th of March 6BC, a conjunction between Saturn and the Moon occurred in Pisces; followed the next day by a conjunction between Jupiter and the Moon in Aries and preceding the March Equinox in a joining of the Sun, Jupiter and Saturn with the Moon across the 'Change of the Platonic Ages' from the 'Age of Aries' into the 'Age of Pisces'.

The 'occulted' two successive 'New Isaiashean Moons' in Pisces and Aries and separated by the 'balancing' Full Moon of Libra next to the Equinox of 6BC then revisited both of the Jupiter- and Saturn lunar occultations following this divisor nexus between the zodiacal ages to herald the birth of a 'Jewish King' and as augured by Babylonian astrologers; assigning the planet Saturn to be the 'Protector of Israel' and the planet Jupiter to be the 'Planet of the Kings' with Aries, the celestial Ram being the 'Sign' or emblem of the Jewish nation.

On Friday, 16th of April 6BC, Saturn again eclipsed the Moon in Pisces and again on the next day on Saturday, 17th of April 6BC, Jupiter reocculted the Moon in Aries and rose in the East of Jerusalem as the 'Planet of the Kings' as the 'Morning Star' of Bethlehem in the Hebrew symbol of Aries the Ram and to 'confirm' in this twinned double conjunction between Saturn-Moon-Jupiter that a 'Jewish King' of the Hebrews was born and so completing the 'prophecy of Isaiah' in the 'New Moon' of the Ram of Abraham on the following day of 18th April 6BC.

Jesus of Nazareth was born in the month from Friday, March 19th to Sunday, April 18th 6BC after the Equinox of Tuesday, March 23rd to March 24th 6BC to fulfil the 'Coming of the Redeemer of the Promises to the ancestors' and through and by the agency of the monthly sojourn of a lunation of the 'boundary' Isaiah Moons as written in the ancient scrolls of prophecy for a birth on Saturday, April 17th 6BC.

The calculus engages 26,000 'precessional' 'Great Platonic' 360-Day Years for 9,360,000/12=780,000 days per 'astrological age' and constituting 2,135.56 'Civil Gregorian' calendar years for one 'zodiacal eon' comprising 25,626.81 'civil years' in the chronos of time measurements in the era 2014.

A Dawn of Human Civilization in the 5th , Precessional Cycle from the Midpoint of 10,802 BC

We begin with the beginning of the Mayan timeline and coinciding with one of the first archaeologically verified urbanizations of the human history and as exemplified in the Mesopotamian city of Uruk about 3000 BC. Others include Nabta Playa in Southern Egypt about 6000 BC and Jericho in Palestine about 9600 BC and Göbekli Tepe and Catal Huyuk about 10,000 BC and 7,000 BC in Turkey respectively. This time was also the time of the Pyramids and the time of the Egyptian Sphinx.

Using certain timeless indicators, the Maya may apply a given Platonic Cycle to substructure the same in any appropriate manner suitable for its purposes.

One such indicator will be a precise mapping of a precessional configuration with the starry constellations of the zodiac to some monument on the surface of the earth.

Following are some scriptural encodings and suggested decoding.

Isaiah 19:19-20 - KJV

"In that day shall there be an altar to the Lord in the midst of the land of Egypt, and a pillar at the border thereof to the Lord. And it shall be for a sign and for a witness unto the Lord of hosts in the land of Egypt: for they shall cry unto the Lord because of the oppressors, and he shall send them a savior, and a great one, and he shall deliver them."

According to a theory by Robert Bauval, the positions of the Giza pyramids on the ground reflect the positions of the stars in the constellation Orion circa 10,500 B.C.(Graham Hancock, Keeper Of Genesis pp.354-355) Five of the 7 brightest stars have pyramid equivalents:

"The 3 great pyramids of Khufu, Khafra, and Menkaura for the belt of Orion, the pyramid of Nebka at Abu Rawash corresponds to the star Saiph and the pyramid at Zawat al Aryan corresponds to the star Bellatrix. The Nile river corresponds to the Milky Way. The principal Giza monuments formed an accurate terrestrial map of the stars of Orion and Sirius as these constellations appeared in 10,500 BC.

Who could have been observing the skies over Giza in 10,500 BC and who, at that date, would have had the technical capacity to realize such monumental works as the Sphinx and the pyramids? Egyptologists assert there was no civilization on Earth at that time, let alone one capable of planning and building such immense, well-engineered structures. If they are right, why do the alignments of Giza so plainly and repetitively mirror the skies of the 11th millennium BC?"

There is an answer in Scripture codes:

Jeremiah.32:20:

God has set signs and wonders in the land of Egypt, even to this day.

Josephus writes in The Antiquities of the Jews 1.2.3:

They also were the inventors of that peculiar sort of wisdom which is concerned with the heavenly bodies, and their order. And that their inventions might not be lost before they were sufficiently known, upon Adam's prediction that the world was to be destroyed at one time by the force of fire, and at another time by the violence and quantity of water, they made two pillars; the one of brick, the other of stone: they inscribed their discoveries on them both, that in case the pillar of brick should be destroyed by the flood, the pillar of stone might remain, and exhibit those discoveries to mankind; and also inform them that there was another pillar of brick erected by them. Now this remains in the land of Siriad to this day.

The treatise above so superposes the Mayan Great Precessional Cycle onto the Long Count from August 11th, 3114 BC to December 21st, 2012.

The discovery of Catal Huyuk, an ancient city in Anatolia, now modern Turkey and dating to 8000 BC challenged the accepted status quo of modern archaeology and the orthodox description for the timeline for the evolvement of modern man as an urbanite and city dweller.

One distinguishing factor of Catal Huyuk was its worship of the feminine principle. It is often called the source of the Mother Goddess religions.

The Mayan Precessional Age of Cancer spanned the period from 8,681 BC to 6,545 BC and as the star sign of Cancer symbolizes the Mother, so does its zodiacal opposite of Capricorn archetype the Father in the older Precessional Mayan Age of Capricorn from 21,495 BC to 19,359 BC.

As the consensus of the academic orthodoxy requires physical evidence to support hypotheses and theories about the human history and timelines; the physical discovery of Catal Huyuk came as a big surprise.

Hitherto the Mesopotamian cities of Samarra, Halaf, Ubaid and Uruk were believed to date no earlier than about 5000 BC.

At that time, the Sumerian cities evolved and with it came the introduction of bronze casting and early forms of writing.

And the general beginning of human civilization is dated to this time period and is particularised in the Unification of Lower and Upper Egypt about 3100 BC, which is also the start of the Mayan Long Count.

The excavation of Catal Huyuk so 'forced' the orthodoxy to revise its beginning of the human urbanization of regions to 10,000 BC with the discovery of an 'older' Jericho dating to about 9000 BC and the first use of copper in Hassuna ware and the manufacturing and trading of pottery dating to about 7000 BC.

The building of the Giza pyramids is conventionally dated to the Old Egyptian kingdom of the 3rd and 4th dynasties from about 2686 BC to 2494 BC.

In the 4th dynasty, began in reign by Snefru; Khufu or Cheops is said to have built the first one; with Khafre or Chepren the second and with Menkaure or Mycerinus to have built the third one of the Giza complex.

Then it is proposed that Khafre also built the Sphinx or Harmakhis, also called Herakhte (Horus of the Horizon).

This places the 4th dynasty into the Mayan Age of Taurus from 4410 BC to 2274 BC and forms a nexus point with the Heliopolis of the Ra-Sun god worship instigated in the 2nd dynasty but made a state religion in the 5th dynasty.

Rah or Ra or Re became known as Re-Harakhtys in the New Kingdom from about 1570 BC -1070 BC for the 18th to the 20th dynasties and as the 'Horus of Two Horizons'. This then became implemented in the Mayan Age of Aries from 2274 BC until the time of the Dead Sea Scrolls 'Teacher of Righteousness' in 139 BC and heralding the 'Coming of the Melchizedek' of the fulfilment of scripture in Yeshuah Ben Joseph Bar Thomas Dydimos a little over a century later.

A period of 'Hellenization of Judea', instigated by the Seleucid empire established by Alexander the Great, was resisted in a 20-year period from 196 BC to 176 BC by the 'Teacher of Righteousness' and as the Zadokite-Davidic High priest Onias III and who was 'born' into this Melchizedekian role in 196 BC and coinciding with Judea becoming a Seleucid province.

Onias III was murdered at the instigation of Menelaus in 171 BC and became succeeded by the 'Man of the Lie' in his son Onias IV, who emigrated to Egypt to build a 'substitute temple' in Leontopolis under the patronage of Egyptian king Ptolemy Philometor (182 BC to 146 BC).

His inauguration of Israelite worship outside of Zion is in direct breach of biblical law, only allowing a single sanctuary at Jerusalem and as coded in Dead Sea Scroll (DSC) 4Q266.Frag.5ii.

The 'House of Absalom' is the 'House of David' and his son Absalom rebelling against him is retold in Onias IV dishonoring his father Onias III and as encoded in DSC 1QpHab.v.9-12 and in 2Samuel.13.

The 'Wicked Priest' in the Dead-Sea-Scrolls is Jesus-Jason, the brother of Onias III, who abandoned his Zadokian-Davidic heritage for a perceived Hellenization of the covenant.

Antiochus-Epiphanes IV deposed the last true Zadokite-Davidic High priest Onias III in 175 BC and replaced him with his Hellenophile brother Jesus, the latter renaming himself in the Greek style as Jason. But in 172 BC, Jason was deposed and his office transferred to Menelaus from 172 BC to 162 BC. Following the murder of Onias III in 1971 BC, Antiochus IV and Menelaus plundered the temple at Jerusalem in 169 BC and in 168 BC Antiochus IV was defeated by the Romans in his second campaign against Egypt.

In 167 BC, Jews who opposed the unification of the Seleucid empire and refused to accept Greek custom and religion were prosecuted in the attempt to 'absorb' the Jewish religion.

In 166 BC, the Maccabees rose in revolt under the leadership of Judas Maccabee to end a 7-year period of confusion from 174 BC to 167 BC and so fulfilling Daniel's prophecy encoded in Daniel.9.24-27 and related encodings in Ezekiel.3.15 and Daniel.9.26-27 in a timeline dating before the 'Coming of the Shiloh'.

The exposition on the gnostic meanings in the Dead-Sea-Scrolls is actually a continuation of the Babylonian Exile, beginning with the last 'king of righteousness' in Josiah and who was killed in the battle of Megiddo or Armageddon by Pharaoh Necho, king of Egypt, encoded in 2Kings.22.2; 23.25,29-32. 70 years of the Babylonian captivity so add the 'forsaken period' from 608 BC to 586 BC, when king Nebuchadnezzar took Jerusalem until the 'Edict of Cyrus' in 538 BC, coded in 2Chronicles.36.1-23.

390 day years from 586 BC lead to the year 196 BC, from which the 22 years from 608 BC to 586 BC are subtracted for the year-week of confusion encoded in the period 174 BC to 167 BC.

The 390 years are encoded in **DSC 4Q268.Frag.1** and in which also the 20 year duration is specified.

Translation by Geza Vermes

"For when they were unfaithful and forsook Him, He hid His face from Israel and His Sanctuary and delivered them up to the sword. But remembering the covenant of the forefathers, He left a remnant to Israel and did not deliver it up to be destroyed.

And in the age of wrath, 390 years after He had given them into the hand of King Nebuchadnezzar of Babylon, He visited them, and He caused a plant root to spring from Israel and Aaron to inherit His Land and to prosper on the good things of His earth. And they perceived their iniquity and recognized that they were guilty men, yet for 20 years they were like blind men groping for the way."

The Babylonian captivity of 70 years is naturally connected with the Egyptian captivity of 430 years and leading to the Exodus under Moses.

But there are seemingly unsurmountable differences between the historical evidence for such an exodus and the Egyptian history engaging certain Hyksos or 'Shepherd Kings' and a thorough elucidation on this subject matter is warranted and will be addressed in other chapters of this book.

Technical Addendum:

The Luminosity Merkabah of Thuban and the Lightbody Constant L_o

Merkabah-Transduction-Constant: $L_o = 1/[6 \times 10^{15}]$ (dimensionless);

Creation Gamma Photon Frequency: $f_{ps} = E_{ps}/h = 3 \times 10^{30} \text{ Hz}^*$

Merkabah-Frequency: $L_o f_{ps} = 5 \times 10^{14} \text{ Hz}^* = c/\lambda_{ps}$ for

Merkabah-Wavelength: $\lambda_{ps} = c/L_o f_{ps} = 6000 \text{ Angströms}^*$, the wavelength of Orange Light.

The Orange Colour of Interterrestrial Spacecraft is intrinsically related to orthodox 4-dimensional spacetime physics in a fundamental 'Constant of Nature', say as the 'Speed of Light c ' or the Planckian Quantum Action Constant ' h '.

The Cosmic Master Algorithm SE_{ps} {Sequence of Primary Source Sink Energy} generated the following ten numeracies from its underpinning supersymmetric pentagonal (Fibonacci-Phi) 'sacred cosmogenetic quantum geometry': 4; 6; 7; $1/[6 \times 10^{15}]$; 9×10^{16} ; 11; $1/[15 \times 10^{32}]$; 14×15^{24} ; $1/[15 \times 16^{18}]$; 26×65^{61} .

Any arbitrary measurement system of any sentient cosmic civilization (say as an Universal Observer) in any defined spacetime can then experimentally determine these and other mathematical relationships between experimental data and the energy ratios in their contexts of dynamical interactions.

The Universal Observer or UO say has a mensuration system SI (System International on Terra) and can

then calibrate hisher SI-system to the 'Star(*)-System' in the frame of reference of the UO, based on the numeracies as given in the above.

The extended SE_{ps} -Algorithm then assumes the pretext of defining open and closed superstrings (in five classes derived from a 26-dimensional bosonic supersymmetry) in the logical statement:

"ADD THE END TO THE BEGINNING AND START THE NEW BEGINNING WITH THE OLD END!"

This specifies the methodology of recircularizing the linearized dimensions of the binary dyad (0,1) into the root-reducible decimal monad {0,1,2,3,4,5,6,7,8,9} with $10=1+0=1^*$; $11=1+1=2^*$, $12=1+2=3^*$ and so on with $26=17^*=8^{**}$ and $27=18^*=9^{**}$.

Labeling the encoded Cosmic Initiator Constant $E'=266561$ from $E=26 \times 65^{61}$ then transforms E' into F' as the Mayan Super-number 1366560 and as described in the Dresden Codex of the Mayan historian database.

$E' \rightarrow F' \rightarrow G'$ as $E'=266561$ and $F'=136656$ and $G'=673665$, after which the 'Inflation Algorithm' ends, since $5+6=11=2^*$ is root-reductive.

Setting the Inflation-Spacetime-Markers as the ABCDEFGH...XYZA*B*C*...symbolised encoding; we find ABCD=H with $D=465612$; $C=256124$; $B=361242$ and $A=312423$.

As no archetype can yield $Z(Z+A)BCXY=312423$ from $ABCXYZ=(1-Z)24233$, the algorithm again ends in the reflected root-reduction to H, namely $1-Z=1-3=-2=-11'=-2^*$.

This elementary constant of nature is as old and is described by the same Logos algorithms, which generated the well-known constants c, h and k to describe Energy Ratios in terms of Mass, Frequency and Thermodynamic Temperature.
